PROJECT MANAGER

Roles & Responsibilities

- Plan, direct, and coordinate activities related to agricultural production, forestry, and aquaculture.
- Analyze statistical data, studies, and reports to identify and determine the root causes of issues and develop recommendations for improving agricultural systems, procedures, or programs.
- Ensure efficient use of resources and fulfillment of production quotas.
- Plan overall agricultural projects and organizational development by setting goals and budget requirements.
- Control expenses and ensure resources are utilized efficiently.
- Oversee the selection, training, and performance of staff through consultation, supervision, and liaison activities.
- Attend meetings and conferences related to products, livestock, and agricultural practices.
- Negotiate with suppliers, customers, and other organizations.
- Manage the marketing of the company's agricultural products.
- Explore new opportunities to generate revenue for the company.
- Prepare paperwork and reports related to company projects.
- Represent the department in dealings with other divisions within the enterprise or with external organizations.
- Perform related tasks as assigned.
- Manage, plan, schedule, and monitor the assignments of other staff.
